By answering the following questions, you will assist us to decide if you are a candidate for ESWT.

- |   |         |
|---|---------|
| • Do you have a bleeding disorder/ tendency?        | Yes/ No |
| • Are you on NSAIDS or anti-coagulant treatment?    | Yes/ No |
| • Have you been injected with cortisone this month? | Yes/ No |
| • Are you using a cardiac pacemaker?                | Yes/ No |
| • Do you have cancer or a tumor?                    | Yes/ No |
| • Do you have a tear in a tendon?                   | Yes/ No |
| • Do you have a skin infection?                     | Yes/ No |
| • Are you pregnant? (Ladies)                        | Yes/ No |

### RISKS OF THIS PROCEDURE

- Petechiae or mild bruising. This ordinarily subsides not requiring treatment.
- Pain and soreness. This is temporary and resolves after a week.
- Tendon rupture and nerve injury. This is avoided with treatment using lower energy levels and by avoiding the nerve, if you have reason to think this would remotely be an issue.

### CONSENT FOR PROCEDURE

Date \_\_\_\_\_

I, \_\_\_\_\_, the Undersigned, do hereby consent to authorize the application of Extracorporeal ShockWave Therapy (ESWT) for my condition of \_\_\_\_\_.

I have been fully informed of focal Extracorporeal ShockWave Therapy (ESWT) which use has been fully explained to me by my provider, and I fully understand the nature of this treatment. I also confirm that I have been given the opportunity to discuss and clarify any concerns and that no guarantees have been made to me as to the result/ outcome of the treatment. All persons do not respond the same way.

I have been advised that the treatment with ESWT will be mostly for pain relief and may offer an improvement of function. I also understand foregoing treatment is not the first option for my condition and an alternative treatment has already been provided or offered to me.
